ABOUT ME

Computer Engineering graduate with fullstack development experience using Node.js, Golang, and React.js. Proven ability to build secure, scalable RESTful APIs with Clean Architecture, CI/CD implementation, and role-based access control. Contributed as Fullstack Developer to the team's 1st Place win at HackIn Fest 2025. Experienced in Agile environments and **highly motivated to deliver end-to-end digital solutions with real business impact.**

EDUCATION

Diponegoro University
S1 Computer Engineering

Semarang, ID
GPA: 3.82 / 4.0

- **Thesis:** "Parent Monitoring System for Student Assessment and Progress at SDIT Darussalam 01 Batam: Backend Development"

INTERNSHIP & PROJECT EXPERIENCE

PT Sinergi Informatika Semen Indonesia

Jakarta, ID

Developer – Internship

Okt 2025 - Present

- Developed and integrated **8+ high-priority modules for Vendor Management System (VMS) and Tender Management System (TMS)**, directly contributing to a more streamlined procurement process.
- Collaborate daily within a cross-functional Agile team, translating Figma designs into **responsive UI components** and **ensuring seamless API integration** by **resolving critical bugs identified** during post-functional testing.
- **Technologies:** Vue.js, React.js, Agile Methodology

Dicoding Indonesia – Expert Back-End JavaScript

Online

Backend Developer – Final Submission Course (Forum API)

Jan 2026

- **Architected and deployed a production-ready RESTful Forum API with 15+ secured endpoints** (threads, comments, replies, likes), strictly adhering to Clean Architecture principles to ensure long-term maintainability and scalability.
- **Engineered a robust security infrastructure** by implementing JWT authentication and NGINX rate limiting (90 requests/minute), safeguarding the application against common web exploits.
- **Achieved 100% test coverage** through comprehensive unit and integration tests and **automated the build and deployment process** using a CI/CD pipeline with GitHub Actions.
- **Technologies:** Node.js, PostgreSQL, RBAC, JWT, NGINX, GitHub Actions, CI/CD, Clean Architecture

PT SUCOFINDO – Sistem Akses Kilat Terpadu Informasi Jasa

Remote

Fullstack Developer External – Innovation Competition Project

Jul – Oct 2025

- **Achievement: Contributed** to the team's **1st Place win - Service Innovation Category** at HackIn Fest 2025 by independently **developing the backend and frontend for the SAKTI digital platform.**
- **Analyzed complex business requirements** into technical design, conducted gap analysis, defined secure system architecture, and developed **50+ RESTful APIs with JWT–Argon2 authentication** and **role-based access control for 4 distinct user roles.**
- Delivered a production-ready system within a 3-month deadline, **successfully consolidating 142 service records and 25 unit datasets to improve internal information access.**
- **Technologies:** Node.js, Express.js, React.js, MySQL, JWT, Argon2, RBAC

SDIT Darussalam 01 Batam

Semarang, ID

Backend Developer – Undergraduate Thesis (DarusTrack)

Aug 2024 – Jun 2025

- **Designed and developed a RESTful API** with granular role-based access (Admin, Teacher, Parent, Principal) **covering 20+ academic workflows**, enhancing communication and data accessibility for the school community.
- **Created comprehensive system documentation and business process flows** and **validated system stability and performance** by executing load, stress, and spike tests using JMeter and Postman, confirming the system's ability to **handle 300+ concurrent users without degradation.**
- **Deployed the backend** on Railway, ensuring 24/7 production readiness and real-world applicability.
- **Technologies:** Node.js, Express.js, MySQL, RBAC, JWT, Bcrypt, Railway, JMeter, Postman

PT Praisindo Teknologi

Jakarta, ID

Backend Developer – Internship

Jan – Apr 2024

- Developed **2 core RESTful APIs** (AML Watchlist Approval/Rejection and Customer Risk Profile Detail) using **Golang** and **MongoDB** within a microservices architecture.
- **Created detailed technical documentation** to ensure seamless integration across backend, frontend, and QA teams, demonstrating strong communication and documentation skills.
- **Actively contributed** to all sprint ceremonies **in an Agile team of 10+**, using Azure DevOps to track progress and deliver tasks **across 2 complete cycles**.
- **Technologies:** Golang, MongoDB, Microservices, Azure DevOps, Git

CERTIFICATION

- **Dicoding Indonesia:** Introduction to Artificial Intelligence (2026), AWS Cloud and Generative AI Fundamentals (2026), Back-End Developer Expert with JavaScript (2026), Fundamental Back-End with JavaScript (2025), Architecting on AWS (2025), JavaScript Programming (2025), SOLID Programming Principles (2024), Git & GitHub Fundamentals (2024), SQL Fundamentals (2023)
- **Pusat Pengembangan Talenta Digital:** Intermediate Junior Web Developer (2025)
- **Oracle Academy:** Database Foundations & Design (2023)
- **Skilvul:** HTML, CSS, JavaScript, Web Development Basics (2023)

ORGANIZATIONAL EXPERIENCE

ALMUHARRIK

Semarang, ID

Head – Annisa Division

Sep 2023 – May 2024

- Promoted to lead the division after being **awarded Best Staff 2022** for outstanding performance and initiative.
- **Directed a team** to execute 7 programs (5 internal, 2 cross-departmental), meticulously planning timelines and guiding members to **ensure 100% on-schedule delivery** and **high participant engagement** (+25 attendees per major event).
- **Orchestrated 3 cross-departmental collaborations**, demonstrating strong networking, negotiation, and project management skills.

Computer Engineering Research Club

Semarang, ID

Member – Software Division

Apr 2023 – Oct 2024

- Selected as 1 of 26 members from 46 applicants through a competitive selection process.
- **Completed structured technical mentoring in web fundamentals** (HTML, CSS, JavaScript, Bootstrap) and **developed a responsive portfolio website**, applying **Git-based version control** workflows to manage and publish code collaboratively via GitHub.

SKILLS, ACHIEVEMENTS & INTERESTS

- **Backend & API Development:** Node.js, Express.js, Golang, RESTful API Design, Microservices, Clean Architecture
- **Frontend Development:** React.js, Vue.js
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Database Design & Query Optimization
- **DevOps & Deployment:** CI/CD (GitHub Actions), Railway, NGINX, Basic Cloud Knowledge (AWS)
- **Security & Authentication:** JWT, Role-Based Access Control (RBAC), Argon2, Bcrypt
- **Testing & Performance:** Unit Testing, Integration Testing, JMeter, Postman
- **Tools & Methodologies:** Git, GitHub, Azure DevOps, Agile Scrum
- **Achievement:** Contributed to SAKTI – 1st Place winner - Service Innovation Category at HackIn'Fest 2025; Best Staff Award 2022 for outstanding leadership & flawless execution of programs.
- **Languages:** Indonesia (native), English (TOEFS: 566)
